The title is 'How To Win the Lottery EVERY Week and Never Buy a Ticket!'. Below the title, it says 'by Professional Lottery Player Paul e Watts'. The book is set against a bright yellow background and casts a soft shadow on the surface below it.

**How To
Win the Lottery
EVERY Week and
Never Buy a Ticket!**

by Professional Lottery Player

Paul e Watts

Is this for real?

Is it really possible to win the lottery every week?

Can anyone really predict that with 100% certainty?

If that were possible and a system was available to guarantee it then wouldn't everyone want to get in on the act? And if they did of course then the very foundation of lotteries worldwide would crumble. There would be more expenditure than income. Not a very viable business venture I think you'll agree?

It's absolutely crazy to suggest that anyone has the power to win every week. Or the magic. Or the mathematical knowledge. Or whatever.

So...how can I make claim to the title of this little publication?

Simple – I do win the lottery every week!

And I'll be showing how you can do it too!

The fact is...literally anyone can do this. **You can do this!** It's not only legal – it's totally ethical and is based upon two of the richest lotteries in the world;- the **UK Lotto and the EuroMillions**.

Why doesn't everyone do this?

Do you know - I'm not sure.

Maybe it's scepticism.

Maybe it sounds too good to be true.

Maybe people are afraid.

Maybe they don't understand.

I believe the main reason though is that they simply aren't aware of it.

Millions of people buy lottery tickets all over the world but in comparison there's a mere handful that are aware that there's a far better way to play. A smarter way. A way to increase your chances phenomenally and to the point where you really can't fail to win every week!

Many years ago an American set out to be a huge jackpot winner. Attracted by the gigantic jackpots in one of the main USA lotteries he actually set up an office and a business and recruited and paid people to go out and buy tickets. He'd set up a computer to run off all the combinations of numbers and then paid hundreds of people out to buy them. He won the lottery and made his fortune. It must have been a logistical nightmare organising – but it worked. If, however, you're thinking you have to go out and arrange a similar operation then forget it. This is so much easier but may take a little longer.

Follow my guidelines and you will win.

And you'll eventually win every week.

Believe it or not this little publication holds all the secrets to enable the reader to do just that - win the lottery every week. And I know you won't believe it at this early stage. I wouldn't expect you to. It sounds ridiculous doesn't it?

I know what you're thinking right now – you're thinking 'it's impossible – what planet is this guy on?'. Am I right? Of course I'm right – if I were in your shoes right now I'd be thinking exactly that and I'd probably put this on one side and get on with something useful.

But.....I promise you categorically, by the end of this book you'll understand exactly how to do it and I guarantee you'll want to go right out and get started today... because once you see how simple this is you'll know you can do it too!

I'm going to insert a very bold statement here that I know sounds truly unbelievable but I would ask that you just keep an open mind here and accept this statement as fact and total truth.

'My name is Paul E. Watts and I play the UK Lotto and the EuroMillions. I win every week without fail and...it costs me...nothing!'

If you read and digest what I have to tell and then take a few simple steps you will be able to confidently insert your own name in the above statement. It won't happen overnight but if you follow me you too will have the chance to win every week and never buy a ticket!

Where's the catch?

Well...I've been doing this for many months now and I can honestly say I haven't found one!

Actually, if there is a catch I suppose it is having the ability to open one's mind wide enough to accept that there is a way. That it is possible. The vast majority of people are too sceptical to believe it. I know. I was one – in fact I'm one of the most sceptical people around. I see gullibility all about me. People tell me how they've been conned out of hard-earned money by companies and individuals who are there just to make money from the so-called gullible public. People tell me of letters they receive from companies in faraway lands telling them they've won £10,000,000 in a prize draw they've never entered but still gladly send £3,500 off to them for 'Administration to release the funds'. How gullible can people be?

What I want to show you here is a system that is faultless and doesn't involve investment (risk) of any kind. It will cost you, dear reader, - peanuts and not only will you have the same opportunity to win every week, you could play for free and if you wish - be paid for showing other people how they can do the same. Please don't misunderstand me here – I'm not suggesting here that you consider this as a business proposition – you might want to – but that comes later if you wish to pursue this route.

What I want to tell you about here is purely what is implied in the title of the publication **'How To Win The Lottery EVERY Week And Never Buy A Ticket!'**

Modus Operandi

OK – let's get down to the nitty gritty. How do you do what I do?

You may know that playing in a lottery syndicate gives you a greater chance of winning – it's a known fact – the vast majority of lottery jackpots are won by syndicates. It's still luck of course but one stands a greater chance of winning in a syndicate than playing on their own.

Stay with me on this...this is not about organising your own syndicate – this will never guarantee a win every week and of course you still have to buy your tickets.

Clearly what is needed is something far cleverer than this:- a mathematical formula that stacks the chances of winning far higher than an ordinary syndicate. A system that is pure genius. A system that means you can't fail. A system that involves multiple wins in multiple syndicates. In essence that is precisely what I'm talking about here. Don't go away – it gets better – remember I said you don't need huge investment? I'm not suggesting that you buy your way into hundreds of syndicates in order to be successful.

This is the really exciting bit – I will show you a way where you can buy a position in just one syndicate and in time following my guidelines you will be placed automatically in 6 other syndicates absolutely free of charge! Once you reach this level it's almost certain that you'll win every week and quite often more than once.

The person who devised this amazing system has been called a genius. I personally think that title is a little over-the-top. Why? Because he's a professor in mathematics. It's his job. And with anything – if it's something you do every day – you become highly skilled. And when he was asked to devise a unique syndicate system for the UK Lotto and later the EuroMillions – he rose confidently to the challenge and produced something that I believe is pure magic!

I'm going to suggest you take a look at a website in a moment that will show you in more detail how the whole system works and how you can join in the fun and excitement starting from today – in fact in less than an hour from now but first:-

Here comes the crunch!

For something so unique. So dynamic. You will have to pay hundreds right? Wrong! Less than a hundred. Less than fifty. In fact I think this is so ridiculously cheap that it could even put you off taking the step into what is for you right now – the unknown. The cost believe it or believe it not is just £4.99 GBP (Please visit <http://www.xe.com/ucc> for Currency Converter).

OK. It's actually a bit more than that – although there is no contract to stay in the syndicate for any length of time – you can opt-out at any time - the cost of £4.99 is actually an annual cost. As I write this – I'm thinking 'I've been in this for over two years and I still find this difficult to believe that the cost is so low'.

There's just one more thing. The cost of £4.99 is your annual affiliate membership. You'll be playing in a lottery syndicate – the UK Lotto, the EuroMillions or both if you wish – entirely your choice. And of course it goes without saying that certainly at the outset you'll be paying for the privilege of the chance – and a much greater chance I may add – of winning a prize.

But this is just such a brilliant deal:

You will have 44 entries into Saturday's AND Wednesday's UK Lotto – that's 88 entries every week for just £5*. And if you want to play in the EuroMillions also with 36 entries every Friday night that's another £5*.

However, that £5* or £10* per week is what I will help you to cover – the aim being that you never have to pay for a ticket at all – EVER!

If you decide to join me in this (£4.99* per year don't forget) I'll show you how you can play for free for life in both lotteries with a 702% greater chance of scooping the jackpot in the UK Lotto and a massive 3,600% greater chance of scooping a massive jackpot in EuroMillions.

***Use <http://www.xe.com/ucc> for Currency Converter**

The mathematical formula that drives this whole thing actually gives you a 1 in 13 chance of winning any prize in the UK Lotto and an incredible 1 in 4 chance of a prize in the EuroMillions.

You don't have to be in the UK or Europe to play and win – this is truly global with 133 countries participating so you can play, and play for free, anywhere in the world.

And how can I safely state that I win every week without fail? Because I'm in more than one syndicate – in fact I'm currently in seven yet I've only paid to go into one – the others have been gifted to me. And my cost for the one syndicate that I do pay into is covered and paid for by other people and has been from my very first week.

All sounds a bit confusing? Not to worry. I've finished here now and I would just like to invite you to a very short movie that may make it clearer. Please visit the website featured below where you'll not only find out all about how the system works, how you can play for free for life and win every week, but discover how you can create an ongoing-income too.
